

Awning System

markilux syncra fix / syncra uno fix pergola

The ideal awning frame system with the minimum of space requirements – stylish sun and wet weather protection for large areas.

Product characteristics

Wind resistance class 3

Beaufort 6 → 10.5–13.4 m/s | 38–48 km/h | 24–30 mph

1 symmetrical footplate, standard

1 syncra uno fix with asymmetrical footplate, post close to the wall

2 available with either round or square posts

3 syncra fix, round post

3 syncra uno fix, round post

4 cabling is run through maintenance ducts

continuous bracket fixture slots with plastic fillet ¹⁾

1) optional configuration

Product characteristics

Description

- free-standing aluminium frame system for the installation of markilux pergola awnings with an extension of up to 6 m on both sides (fix version) or on one side (uno fix version).

Special features

- free-standing protection against sun and rain – up to 30 m² can be covered on each side with only one field
- the perfect solution especially for commercial, hotel and gastronomy requirements
- a post-free area under the awning
- awnings can be operated independently of one another
- support posts optionally round or square, incl. footplates which are bolted on
- posts with integrated cable ducts and maintenance cover
- aluminium frame system including top cover profile
- simple fixture of the awning frame to concrete foundations
- free-standing installation; can also be fixed to a wall on one side.
- syncra uno fix enables wall-close installation of awnings when the wall is not suitable
- powder coating available in seven markilux standard frame colours or in non-standard colours
- for configuration options, colours and dimensions please consult the pergola section of the sales manual

Dimensions

- maximum field width 600 cm
- support post height: standard height 320 cm, maximum height 450 cm (on request)
- posts available in intermediate heights
- a coupled system is available up to 3 fields

Awning profiles

- extruded aluminium, in façade quality, powder coated
- support posts round Ø 140 mm or square 125 × 125 mm
- post base plate square 400 × 400 mm, galvanised steel
- rectangular beam, height 140 mm x depth 80 mm

Optional accessories

- markilux infrared heater
- markilux spotlight LED
- attractive footplate covers, made of die-cast aluminium, powder-coated
- a wide range of brackets for the installation of folding-arm awnings, vertical and side blinds, conservatory and pergola awnings as well as heating and lighting accessories
- set for fixture of the post to the Krinner screw-in foundation
- plastic fillet available (in white RAL 9016 or anthracite ≈ RAL 7016 for the bracket slots in the cross-beam)

markilux planning service

In the case of larger construction projects, markilux can offer comprehensive planning support on request. Based on the dimensions and photographs supplied, on request we are able to offer the following services:

- a realistic photographic representation of the shading system in colour, optionally also as a 3D visualisation
- suggestions for special solutions
- technical drawings depicting possible solutions; they can also be used to accompany building permit submissions
- further consultation services up to final issue of order

A realistic photographic collage and a detailed technical presentation improve the quality of on-site consultation and the chance of success!

Planning permission

N.B! Please note that shading systems may be subject to compulsory planning permission regulations depending on the region!
